**Subject:** Request for extension of 30-day comment period  
**Importance:** High

Dear Lynne, Melanie, Josh, Jim, Kevin, and Bob:

WERC formally requests a 30-day extension of EPA's current review period of the Proposed Plan and associated documents for the Olin Chemical Superfund Site. As you are aware, WERC recently issued a Request for Proposals for a new Technical Advisor. We are in the process of reviewing the responses we received, but have not yet signed a contract.

In order to give our new TA an opportunity to assist us in our review, we respectfully request that EPA extend the review period an additional thirty days beyond the current deadline of September 25th.

Thank you for your consideration.

Martha Stevenson, President  
Wilmington Environmental Restoration Committee
